TRIVIA_TOPICS()

flowchart

(as of November 20, 2024)

Assign each variable with a list containing accepted answer(s) at index 0, the question at index 1, Level 2 Hint at index 2, and Level 3 hint at index 3

(ex. ['VAN', "What is the three letter (in uppercase) used to represent the Vancouver Canucks, a Canadian NHL (National Hockey League) team?", "Level 2 Hint: it starts with a V.",

"Level 3 Hint: it starts with a V and ends with an N. What's the missing letter in between V and N?"]

Create variables easy_list, medium_list, hard_list, very_hard_list, final_boss_list that contains a list with 8, 9, 4, 2, and 1 topic name variable(s) respectively (ex. hard_list = [hockey_team])

Assign variable trivia_list to a list containing all trivia difficulty level lists ([easy_list, medium_list, hard_list, very_hard_list, final_boss_list])

RETURN(trivia_list)
